

Bordetella Waiver

Complete ONLY if you choose to not vaccinate your dog(s) for bordetella

Mobile Paw Spa recommends all dogs staying in our suites to be vaccinated against Bordetella. It is highly contagious & easily transmitted through the air or direct contact. The dogs that live upstairs in the home of the suites have been vaccinated for bordetella & we will not allow any dog(s) to stay that are showing signs of ill health. Even though dogs staying in the suites are kept separated, the suites are on the same floor & visiting dogs will be in close proximity to each other. However, we do not require the vaccination & you may opt out with this waiver.

I opt to not vaccinate my dog(s) for bordetella & release Mobile Spa from any & all liability should my dog(s) contract bordetella as a result of their stay in the Paw Spa Pet Suites.
